

WEST'S IMPROVED PUMP.

ANTI-FREEZING, DOUBLE-ACTING, FORCING AND LIFTING.

THESE pumps have now been in general use a number of years, and give better satisfaction than any other, and are recommended as

THE BEST!
by Capt. Ericson, and other eminent Engineers. We can refer to thousands using them, and guarantee that all will recommend them. They are more simple in construction, and work easier, and cost less than all others.

"Our readers will find the double-acting improved Pump of J. D. West & Co., one of the best in the market. It is very simple, works to a charm, so that any child may use it; throws a steady, continuous stream, and does not freeze in the coldest exposure, and is unusually cheap. We say this knowingly, and give the testimony of our own accord, without the knowledge or request of the proprietors."—*N. Y. Bee Post, July 1st, 1863.*

"This may certify that I have been using, at my manufactory, for the last four years, 'West's Improved Pump.' I now have in use three of said pumps, one of which is kept constantly at work 24 hours each day, (save Sundays) and has been running for the past two years. I pronounce them, unhesitatingly, the best pumps that have been brought to my notice, having used many others previously. They are simple in their construction, and not easily disarranged. JAMES A. WEAVER, N. Y., Oct. 10, 1859.

J. D. West & Co.
We are pleased to state that the Pumps we had of you, about a year ago, are still in constant use, 12 hours each day, and raise for the use of our Woolen Factory, about 130 gallons per minute. They work with but little power, compared with pumps we have used before, and do not get out of repair, and are satisfactory in all respects. Yours, &c., DUNLAP MANUFACTURING COMPANY.

BOLTON ROBINSON to the Farmer's Club, Jan. 23:
"No farmer who owns a well or cistern can possibly afford to be without an iron pump. It should be at once a suction and force pump—a perfect little fire engine—such a one known as 'West's Improved Pump.' I speak of this pump because I happen to know it, to be very simple, durable, powerful and cheap, and it doesn't freeze up, nor get out of order once a year. I know this, and think I may be doing the farmer good by speaking of it. A boy 10 years old can work it, and throw a continuous inch-and-a-quarter stream. It can be made to work in deep wells as well as in shallow ones."

[From the New York Observer.]
"We have had in use for months past one of West's Pumps, which has given us more satisfaction as a force and lifting pump than any we have ever used. It is one of great power, and well adapted for ship's decks, mines, factories, green-houses, gardens, &c., &c. The Mining Chronicle and Railway Journal says: 'It is recommended for its extreme simplicity of construction, great strength, and consequent durability and cheapness of repair.' There is no stuffing box, and the pressure being held by a cup packing, like that upon the working piston, working in a cylinder, fitted for the purpose within the upper chamber—which we think a great improvement, as stuffing is so liable to leak, and the pressure being strong pressure, to say nothing of the loss by friction, incident thereto. It has also two air-chambers: thus the action of the valve is cushioned, upon both sides by air—preventing water hammer and vacuum thump. The valves are very accessible, and simply and cheaply repaired. They work much easier than any pump we have ever seen; the 4 inch cylinder being worked by children in wells 100 feet deep, and at the same time extremely cheap, as well as simple and strong, we freely recommend them."

Gr. Neck, L. I., 1860.
"I have used this pump for a summer and winter, exposed to the North-West wind coming over Long Island Sound, being the coldest possible exposure, and at no time did it freeze, nor were we unable at any time to pump water with great ease. H. B. McVean."

"She undersigned, having to use 'West's Improved Pump,' cheerfully recommends them as simple, durable and powerful in raising and throwing water, and for their ease of action, security against frost, and low price, we believe superior to all others."
WARREN LELAND, Met. Hotel, New York.

DOMINICK LAWRENCE, Westchester.

CAMBRIDGE MINE, N. C., June 15, 1863.
"Gentle—The pump which I ordered for our Mine is received and put to work in our underlay shaft, which we are sinking. We find that one man will raise 50 gallons per minute. We lifted in three and a half hours all the water in the shaft, which measures seven by twelve feet and 30 feet deep, and it was full when we commenced. It answers our expectations in every respect. It will do great service with but trifling expense for repairs. Yours, respectfully,
BORN HODGINS."

"We have plenty more such certificates, but think these are enough. For Pumps, Hose, Pipe, &c., address or call upon
